### **Disclaimer:**

Stone Federation is the national trade association for the natural stone industry.

It is a membership organisation and as such, we have some members who are technical consultants/expert witnesses. If we are approached by a client seeking an expert, we provide them with a list of our members who provide this service. It is then up to the client as to which company, if any, they approach, and if they then subsequently engage them, it is a contractual arrangement between themselves and that member.

Stone Federation does not recommend, provide or employ any technical experts.
