  - Take down, clean & reinstallation of Chiswick Bridge stonework including bottles, copings, stallings & stairs

Labourer – Improver/Fixer, Marmi e Granito , The Stone Theatre (*Jan 2004–June 2013*)

Starting as a labourer I worked my way through the company to become a fixer, learning from experienced colleagues on many aspects of fixing stone, including floors, wall linings, staircases, resin repairs, measuring and templating as well as reading drawings. Working in pressured environments including One Hyde Park and Selfridges as well as many prestigious addresses in Mayfair and Hampstead.

Speaking to clients as well as designers and architects were included in my role, liaising with the factory and office to make sure the jobs and tasks were completed in the best possible manner.
